Contribution ID : 71

Beta-delayed neutron emitters and advances in fast neutron spectroscopy

Tuesday 13 Mar 2018 at 12:15 (00h30')

Content :

The talk will focus on (a) high-resolution gamma-ray spectroscopic studies of beta-delayed neutron-emitters far from stability at the the Californium Rare Isotope Breeder Upgrade (CARIBU) facility at Argonne National Lab; and (b) advances in fast neutron spectroscopic techniques with CLYC scintillators at Los Alamos National Lab and at the Radiation Laboratory at UMass Lowell.
