

## ASET Colloquium

### Data Science-driven Ayurveda

Atreya Innovations stands out as a healthcare tech startup with a strong focus on holistic wellness. Recognizing that true wellness extends beyond mere nutrition and exercise, Atreya Innovations employs data-driven AI algorithms and a combination of modern and traditional healthcare methods to elevate personalized diagnosis and recommendations. The flagship product, Nadi Tarangini, is a testament to the company's commitment to innovation, providing Ayurvedic doctors with comprehensive Nadi reports for enhanced diagnosis. With an upcoming wellness product currently in closed alpha trials, Atreya Innovations demonstrates its dedication to staying at the forefront of healthcare innovation.

### Dr. Aniruddha Joshi (Founder and CEO, Atreya Innovations)

Dr. Aniruddha Joshi is the founder and CEO of Atreya Innovations with the vision of providing the most personal, predictive, and non-invasive health monitor based on data science-driven Ayurveda. He is a computer engineer from Mumbai university and Ph.D. in Computer Science from IIT Bombay with a specialization in data analysis and machine learning.
