

Project: Thirty Meter Telescope (TMT)

Prof. Annapurni Subramaniam, IIA, Bengaluru

Panel Discussion: Leveraging collaboration for Indian science and industry

About the Panel Moderator:

- Annapurni Subramaniam is a professor at the Indian Institute of Astrophysics. She has about three decades of research experience and had published about 200 research publications in topics such as, star clusters, stellar populations, galaxies near the Milky Way, and ultra-violet astronomy. She has guided a large number of students. Annapurni heads the Indian team of the Observatory software (OSW), with the responsibility for software delivery starting from 2019 for the Thirty Meter Telescope (TMT). She is the calibration scientist of the UV Imaging Telescope (UVIT) onboard India's first space observatory, ASTROSAT.
